Download Documentation problems

Broken:

Bug #80572: Download failed for typo3cms.references.t3service in Backend / Download Documentation
<https://forge.typo3.org/issues/80572>

Bug #80573: Download failed for TYPO3 Core in Download Documentation
<https://forge.typo3.org/issues/80573>

What should happen downloading „Developing TYPO3 CMS Extensions with Extbase and Fluid“ ?

Actually nothing happens.... As a user I expect either a download in my browser or an listing in the documentation list. But this is missing.

Question UX

There are currently different titles of the documentation in the download area and in the display area From the perspective of a user, I expect an identical title as a recognition feature. Also the default sorting is different.

Download Documentation

Title	Extension key	Type	Actions
Bootstrap Package	bootstrap_package	Extension	
TYPO3 Core	core	Extension	
Documentation	documentation	Extension	
Salted user password hashes	saltedpasswords	Extension	
Core API Reference	t3api	Reference	
Coding Guidelines	t3cgl	Reference	
Editors Tutorial	t3editors	Tutorial	
Official TYPO3 Extbase and Fluid Guide	t3extbase	Guide	
Developing TYPO3 CMS Extensions with Extbase and Fluid	t3extbasebook	Book	
File Abstraction Layer	t3fal	Reference	
Inside TYPO3	t3inside	Reference	

In „Download Documentation“ there is also **missing a link** to the just downloaded source... Its not a good user action to go back via the top select box or browser <-

The screenshot shows the TYPO3 CMS Backend interface. The left sidebar contains navigation links for WEB (Page, View, List, Functions), FILE (Filelist), ADMIN TOOLS (Extensions, Languages), and SYSTEM (Access, Backend users, Log, Install). The main content area displays the 'TSconfig Reference' page. The top navigation bar includes 'Start' and 'TYPO3 CMS'. Below the navigation is a breadcrumb trail: 'TSconfig Reference 6.2 > TSconfig Reference'. The page title is 'TSconfig Reference'. On the right, there is a table with metadata:

Previous Key:	doc_core_tsconfig
