

TYPO3.Fluid - Bug #11007

PaginateController uses wrong offset

2010-11-22 13:32 - Georg Ringer

Status: Closed	Start date: 2010-11-22

Category: Widgets	Estimated time: 0.00 hour
Target version:	
Has patch:	

Description

The PaginateController doesn't work with an offset set in the original query.

Example:
7 news records should be displayed with an offset of 2 (explanation could be that the 1st 2 records are rendered with a different plugin). itemsPerPage = 3

1st page should show:
item 4
item 5
item 6
2nd page should show
item 7

currently output is:
1st page:
item 4
item 5
item 6
2nd page:
item 4
item 5
item 6
3rd page:
item 7

the possible offset of the query is not checked.

History

#1 - 2010-11-22 13:41 - Georg Ringer

- File fluid-paginate-offset_v2.patch added

#2 - 2010-11-24 20:52 - Bastian Waidelich

- Project changed from 534 to TYPO3.Fluid

#3 - 2010-11-24 20:56 - Bastian Waidelich

- Category set to Widgets

- Branch set to v4 + v5

Note: The first part of the patch:

```
$this->numberOfPages = ceil((count($this->objects)-$query->getOffset()) / (integer)$this->configuration['itemsPerPage']);
```

is not needed anymore, as count() already retrieves the limited number of result (see #10956)

#4 - 2011-05-06 10:35 - Sebastian Kurfuerst

- Status changed from New to Closed

should be fixed now, as the Paginate Widget has been completely rebuilt in v5 (and will be soon backported)
