Browser: TYPO3 without PHP - Feature #11603

Configuration to hide rows with empty values

2010-12-20 18:50 - Lorenz Ulrich

Status:	Resolved	**Start date:**	2010-12-20
Priority:	Should have	**Due date:**	2011-01-11
Assignee:	Dirk Wildt	**% Done:**	100%
Category:	Typoscript	**Estimated time:**	2.00 hours
Target version:	3.6.1	**Spent time:**	0.00 hour

Description

If you're presenting different kinds of data in one database, you often have empty values in some fields. I.e. a book has an ISBN number, an amount of pages while a DVD has a content rating (FSK in Germany), a region code...

It would be nice to have a Typoscript config that removes a row in single view if it's value is empty. This way no hacks would be needed to get a clean single view output.

- Category set to Typoscript

Dear Ulrich,
It seems, you can configure, that empty rows won't be displayed.

Do you speek German?

Please take a look at:
TYPO3 Browser: Felder mit bestimmtem Wert ausblenden
http://typo3-browser-forum.de/fa/list_post/forum/typo3-browser-kochbuch-und-loesungen/thema/typo3-browser-felder-mit-bestimmtem-wert-ausblenden/

Please give a feed-back, if the link in the forum is the solution.

Kind regards
Dirk

Hi Dirk

I speak German and read this article before posting the feature request. But my request is different:

I like the standard functionality of Browser to display all the fields I've selected in the Typoscript setup:

```
<tr>
 <th>Label for Field A</th>
 <td>Value of Field A</td>
</tr>
<tr>
 <th>Label for Field B</th>
 <td>Value of Field B</td>
</tr>
```

etc.

Now what I would like to have is an option that checks **if** there is any value in Field B and if it's not the **whole table row** won't be generated. I know it's possible to achieve that with a rather complicated Typoscript setup, but what I'd like to have is a feature that fits best to the Browser: With some clicks and a few lines of Typoscript you get a nice output of your database data.

Dear Lorenz,
Thanks for your answer and the clear post.

Yes, it would be wonderful, to have a feature like an enable field in the plugin/flexform for displaying or non diyplaying empty rows.

But because you can configure it by TypoScript, this feature desn't have any priority in our timetable.

I guess, the costs for this feature will two hours. Do you have any budget for developing?

Kind regards
Dirk
