#### Description

When calling a ajax widget i recieve this error:

```
Call to undefined method Tx_Extbase_Object_Container_Container::getContainer()
```

I looked into the class and couldn't find such a method.

I replaced it with this:

```
$objectContainer = t3lib_div::makeInstance('Tx_Extbase_Object_Container_Container');  
$objectContainer->registerImplementation($originalClassName, $classConfiguration['className']);
```

and everything works fine.

Patch attached.
