<b>PHP Version:</b>			
<b>Has patch:</b>			

#### Description

I'm trying to validate data on a object which I created in the code and filled with data from a file.

I presume that the localisation causes this exception somehow. The code used to run with version that did not have localisation, yet. Is this a bug or a configuration issue?

Number format was not found. Please check whether CLDR repository is valid.

## History

---

### #1 - 2011-03-21 12:05 - Karsten Dambekalns

- Assignee set to Karol Gusak

Karol, could you have a look at this?

### #2 - 2011-03-24 21:55 - Karsten Dambekalns

- Category changed from - Error Handler Report - to I18n

### #3 - 2011-07-06 19:48 - Karsten Dambekalns

- Status changed from New to Closed

Is this still an issue? I guess not, and we'll disable I18n for 1.0, as the full support will make it into 1.1 only.
