Description merge: a tag where I could put all the pages in and then call other ppl to help sorting and moving/merging the stuff? ++ delete: a tag to mark a page or a section, so that a wiki-admin can delete the pages. must contain a link to the forge-issue http://forge.typo3.org/issues/show/1356

Hello Cyrill,

Hmm I then just use {{Tag|merge}}? That does work already?!?

(I mostly use forge to write, because so it's no double content (no need to copy stuff from email to forge)

No, {{Tag|keyword}} is to tag a word what is contained in a text.

For maintainance-stuff I made it shorter:

{{draft}} and so on.

What I create new tomorrow AFTERNOON (no earlier possible) is:

{{delete}}

and

{{merge|The pagename what should be merged with this}}

So the rendering will be:

MARKED FOR DELETION by {{delete}} (<http://forge.typo3.org/issues/show/1356> see forge-issue 1356)

and this:

MARKED TO MERGE by {{merge|Pagename}} (<http://forge.typo3.org/issues/show/1376> see forge-issue 1376)

OK, so?

Cheers!
Daniel
