[BUGFIX] (Package) Clear message when package dir cannot be deleted

When the removal of a package directory fails, throw an exception that hints at file permissions as a possible cause.

Fixes: #13979  
Change-Id: I445530204cbe7413879b3130610ebc8ba3ab685f

- Priority changed from Must have to Could have

No, it tries to do the right thing, but fails to remove some items due to permission problems. Thus some files are left and the `rmdir()` fails.

Solution: catch those errors and emit a more helpful message.

#### #2 - 2011-03-30 15:40 - Karsten Dambekalns

- Target version set to 1.0 beta 1

Another possible cause: there is a `.svn` or `.git` directory in your package directory. That cannot be deleted right now, see [#25472](#).

Hi guys, thanks for checking.

First of all..no .svn or .git folders where there. For sure

Privileges also shouldn't be a problem because all Packages for test had chmod 777 recursively for all folders. So I think that those two basic things ain't relevant
