Description

providing a different url to replace showpic.php by TS
image.imageLinkWrap.JSwindow.altUrl=typo3conf/ext/dfx_showpic/showpic.php
doesn't pass any information on image file, additional params etc, i.e.

before (w/o .altUrl): e.g. openPic('showpic.php?imglist=uploads%2Fpics%2F2113_10.jpg%7Cupload...',...

after (w .altUrl as mentioned above): e.g. openPic('typo3conf/ext/dfx_showpic/showpic.php',...

This behaviour can be found to ALL versions of Typo3.

(issue imported from #M1153)

History

#1 - 2005-06-02 13:12 - Peter Russ

to test just try:
image.imageLinkWrap.JSwindow.altUrl=showpic.php

which is replacing showpic.php by itself.

#2 - 2006-03-03 17:29 - Michael Stucki

Fixed in CVS.

#3 - 2006-03-12 19:28 - Stanislas Rolland

This change prevents postprocessing of showpic parameters and recalculation of the md5 parameter, since the value calculated in tslib_cObj is appended to the url.

I think that if this altUrl feature is used, it should be up to the script using it to add any required parameters using postUserFunc.

I would propose to revert this change.

#4 - 2006-03-14 22:48 - Michael Stucki

I will have a look at it...

#5 - 2006-04-17 16:46 - Michael Stucki

Sorry, it took a little longer to get back to this. Attached is a patch that adds a new property which can be used to disable the addition of the parameters. Thanks to Dirk Hoffmann.

#6 - 2006-07-07 21:19 - Michael Stucki

Fixed in 4.0.1 and 4.1-dev. You can now set a new TypoScript property "JSwindow.altUrl_noDefaultParams" which skips adding of these parameters.
