Description <p>Currently, ATagParams only takes a string as value. If you'd like to add a background-image dynamically (e. g. in a flexible content element), you can't create the style property with an IMG_RESOURCE object:</p> <pre></pre> <p>That's why I think it would be a good idea to have stdWrap properties for typolink ATagParams.</p> <p>Below is an example how a CSS-background image for a link could be created.</p> <pre>ATagParams.cObject = COA ATagParams.cObject { 10 = IMG_RESOURCE 10 { file { import = uploads/tx_templavoila/ import.current = 1 import.listNum = 0 maxW = 120 } stdWrap.wrap = style="background: #fff url(/) no-repeat 50% 50%;" } } (issue imported from #M1749)</pre>
