Description			
Unit tests are always stored in a subdirectory "tests" of an extension. The Extension Manager should either ignore the whole content of that directory (ie. not report XCLASS errors etc.) or show a message that some unit tests are found.			
(issue imported from #M1904)			

History

#1 - 2006-02-20 19:16 - Karsten Dambekalns

It will ignore it for XCLASS errors (well, everything that is checked in getClassIndexLocallangFiles()).

#2 - 2006-02-20 19:17 - Karsten Dambekalns

I would love to add a link to run existing unit tests with t3unit if it is installed. How would I construct such a link? Thanks! :)

#3 - 2006-02-20 19:33 - Karsten Dambekalns

Linking to t3unit will be done after adding a needed API call to that extension.

#4 - 2012-08-19 13:11 - Felix Kopp

- Target version deleted (0)

Guess this can be closed since the extensionmanager has been recreated and tests are included. Please close this issue.

#5 - 2012-08-19 13:14 - Susanne Moog

- Status changed from New to Closed
