Description

The EM doesn't check for dependencies when you upgrade an extension.

That causes the following error message when you update from an older version of tt_products to the latest: "TYPO3 Fatal Error: Extension key "fh_library" was NOT loaded! (t3lib_extMgm::extPath)".

(issue imported from #M1807)

History

#1 - 2005-12-04 12:25 - Franz Holzinger

I think this is of high priority because the backend is not usable any more afterwards.

#2 - 2005-12-12 16:11 - Sebastian Kurfuerst

Hi,
I head that you are right now working on the EM-
It would be great if you could have a look.
Thanks,
Sebastian

#3 - 2006-03-08 10:43 - Franz Holzinger

It would be great if this could come into TYPO3 4.0 RC1.

#4 - 2006-03-12 11:43 - Karsten Dambekalns

I'll send a patch RFC to the core list today, please have a look.
