Description Can an option for 'column properties' be added like 'row properties' ? It seems unlogical that this option is not there. You might want the add a property to a row. (issue imported from #M2441)

Well, as there is a TR there are intrinsic row properties. You could add a UI for COLS/COLGROUPS to get intrinsic column properties. But I'm not sure if it's those kind of properties you want.

#2 - 2006-03-11 17:09 - Sacha Vorbeck

yes, that would be great. At the moment you can mark a column but when you edit the cell properties the changes are only made for the "active" cell.

#3 - 2008-02-26 07:04 - Stanislas Rolland

See related issue #7667. TYPO3 4.2 now includes a dialogue allowing to set properties on all cells in a column.
