I can't confirm this. When I click on the save&preview button of a localized record I see the correct language in the workspace preview.

#2 - 2007-06-14 12:03 - Graham Solomon

I have had a problem with this recently too.

The issue I have is there is no way to preview the page in an alternative language unless you save & view a record from that alternative language.

The preview frame has a src similar to the following:

http://yourdomain.com/index.php?id=123&L=0&ADMCMDCMD_view=1&ADMCMDCMD_editIcons=1&ADMCMDCMD_previewWS=1

If I switch to an alternative language(using a HMENU object, special=language) it will become the following:

<http://yourdomain.com/index.php?id=123&L=1>

Which is then only a preview of the live version of the alternative language and not the draft.

#3 - 2011-08-29 15:30 - Andreas Wolf

- Status changed from New to Needs Feedback

- Target version deleted (0)

Is this still an issue with the new workspaces module?

#4 - 2011-10-07 12:33 - Tolleiv Nietsch

- Category deleted (Miscellaneous)

- Status changed from Needs Feedback to Closed

- PHP Version deleted (4)

I assume it's not and we've couple of other language related tasks - so I assume this one can be closed.
