Description			
<p>Extension "version" ist not installed in package BETA3, but required for Workspaces; After having made a tt_content change in the default Workspace Version (-1), the preview of that page http://localhost/t3/t340b3/typo3/sysext/version/cm1/index.php?id=1&diffOnly=1 causes the following error: TYPO3 Fatal Error: Extension key "version" was NOT loaded! (t3lib_extMgm::extRelPath) so me feels the EXT version should come preinstalled;</p> <p>(issue imported from #M2616)</p>
