Description

The following value defined in TSconfig of any page is not applied to db_new_content_el.php:
TCEFORM.tt_content.CType.removeItems = html,div,text

If I select "New Content Element" at Web>Page the wizard shows icons of removed items. On selecting a denied item the next page tells me "[INVALID VALUE ("html")]]" at the pull down menu of "Type".

In typo3/sysex/cms/layout/db_new_content_el.php is a function removeInvalidElements(&\$wizardItems) which should additionally check the TSconfig of the current page and - if necessary - remove the denied CTypeps.

If I'm wrong, please let me know.

(issue imported from #M2918)

History

#1 - 2006-03-19 15:43 - Oliver Hader

Okay, I had some time to fix the problem and added some lines to the function removeInvalidElements(&\$wizardItems) in the file typo3/sysex/cms/layout/db_new_content_el.php

The image db_new_content_el_modified.png shows the changes after modifying page TSconfig to the following value:
TCEFORM.tt_content.CType.removeItems = bullets,table,uploads,multimedia,menu,html,mailform,search,login

I found another itsy-bitsy bug on removing unused headers and corrected it in the diff-file added to this post.

#2 - 2006-03-20 16:34 - Michael Stucki

That patch has no effect on my installation?

#3 - 2006-03-20 17:02 - Oliver Hader

However, it seems that I always use "Create new record in top of this column" in the Backend and didn't test the other buttons above. I changed \$this->uid_pid to \$this->id and now it should work - see db_new_content_el_2.php.diff

#4 - 2006-03-20 18:04 - Martin Kutschker

What other buttons? I have tested the "new" icons in Web>page and the "new" entry of the page tree. Works for both methods correctly.

#5 - 2006-03-22 17:20 - Martin Kutschker

Fixed in CVS.
