Description

After downloading an extension which depends on other extension but not on specific versions of them, these dependencies don't appear in the EM locally and are not checked either.
However, these constraints are displayed correctly at TYPO3.org

Download rlmp_eventdb 1.0.4 with EM2 from TER2. View details in the EM: No dependencies are shown.

Constraints of rlmp_eventdb:

```
'depends' => array(
        'php' => '4.3.1-',
        'typo3' => '3.7.1-',
        'cms' => '',
        'lang' => '',
        'address' => '',
        'moneylib' => '',
        'rlmp_dateselectlib' => '',
        'overlib' => '',
        'frontendformslib' => '',
    ),
```

History

#1 - 2006-03-24 23:00 - Karsten Dambekalns

It does respect them if I try to install the extension, at least...

#2 - 2006-03-24 23:02 - Karsten Dambekalns

It shows them in the extension's detail view, too.

#3 - 2006-03-24 23:02 - Karsten Dambekalns

Seems fixed for me, can you double-check? Thanks.

#4 - 2006-04-02 13:09 - Karsten Dambekalns

Any new results?

#5 - 2006-04-03 13:19 - Karsten Dambekalns

News: empty version dependencies work, but for some reason the constraints of the ext in TER do not list moneylib as shown above. Is the above code from your local dev version?

What's the current status?

#7 - 2008-12-08 12:51 - Steffen Kamper

i think the problem is partly solved in new versions.
Anyway there are some issues left which has to be mentioned here.

- Status changed from Accepted to Needs Feedback

- Target version deleted (0)

- PHP Version deleted (5)

Still a problem? I cannot reproduce with current versions.
