Description			
<p>The table tx_dam defines two fields as floats. In the function t3lib_sqlparser::parseFieldDef(), which is called IMHO with activated dbal and if multiplyDBFieldSize is greater 1, float is not implemented.</p> <p>Install dbal and then try to install dam, OR set multiplyDBFieldSize greater then 1 and then try to install dam.</p> <p>Please see closed bugs 2792 and 2793. (issue imported from #M2991)</p>
