Description			
<p>When I try to extend the list of recordsets for a "internal-type db" field (for example I click on the [21 - 95] pildown.gif) the full list doesn't come up.</p> <p>The same with the search fields. When I try to search for a recordset to link to the db-field the right side is empty.</p> <p>I debugged the code and realized that the variable \$GLOBALS['SOBE']->expandPage in class.browse_links.php (line 197) is empty.</p> <p>As a result the link (button) which is rendered doesn't contain the expandPage Parameter. When I enter the expandPage=parameter manually everything works fine.</p> <p>(issue imported from #M3079)</p>

Do you use an own module or RTE HtmlArea?
In the init of the calling module the expandPage must be set.
`$this->expandPage = t3lib_div::_GP('expandPage');`

Hi Holger,

the Element Browser in TYPO3 4.0rc2 was indeed buggy.

On Sunday we will release 4.0rc3 which should fix exactly your problem: The buggy element browser.

Only three days after that, we will release 4.0 final, so it would be great if you could verify that the bug is fixed, immediately after RC3 is released.

Thanks in advance,
cheeers - Ingmar

#3 - 2006-04-01 18:38 - Holger Sorg

Hi Ingmar,

I'll do my best ;o). I think I can check that on Monday.

regards
Holger

#4 - 2006-04-01 18:38 - Ingmar Schlecht

Thanks in advance!

#5 - 2006-04-04 17:58 - Holger Sorg

where can I get the RC3 from?
will it be released on typo3.org?

#6 - 2006-04-04 18:04 - Ingmar Schlecht

Hi Holger,

RC3 is already released but just not announced yet.

You can get it from http://sourceforge.net/project/showfiles.php?group_id=20391&package_id=14557&release_id=48491.

cheers,
ingmar

#7 - 2006-04-04 18:40 - Holger Sorg

thanks for the link.

I just installed RC3 and the element browser works.

regards Holger

Thanks for the feedback!

I have marked this bug as resolved now.

cheers
Ingmar
