

TYPO3 Core - Bug #16103

Enable language dependent fetching of DB fields

2006-04-28 13:44 - Sacha Vorbeck

Description

At the moment you can read the e. g. title of a page (type sysfolder) with either stdWrap.data/getText or RECORDS. But non of them takes language settings into account. The only chance to retrieve the title language-dependant is to set up a HMENU with only one entry.

This should be changed so that both RECORDS and getData would use the title field of the table pages_language_overlay instead of the pages table.

```
10 = RECORDS
10 {
    tables = pages
    source = 59
    dontCheckPid = 1
    conf.pages = COA
    conf.pages {
        10 = TEXT
        10 {
            field = title
        }
    }
}

20 = TEXT
20.data = DB : pages:59:title
(issue imported from #M3374)
```

- Status changed from New to Needs Feedback

The issue is very old, does this issue exists in newer versions of TYPO3 CMS (4.5 or 6.1)?

#3 - 2013-08-13 15:03 - stefan schreck

Yes it does exist in typo3 ver. 4.7.14!!!

#4 - 2013-08-19 11:12 - Alexander Opitz

@Stefan Schreck

TYPO3 CMS 4.7.x will only get security fixes, so the question is, is it reproduceable with latest TYPO3 CMS 6.1 (Which is 6.1.3 at the moment)?

#5 - 2014-01-06 11:26 - Alexander Opitz

- *Status changed from Needs Feedback to Closed*

- *Is Regression set to No*
