Description

If i create an repetitive fce with an image, the wrong path to the image is being set.

In database there's the absolute path to an image already saved. If i insert image in fce in backend, the path is constructed like this:
/customers/customer.de/frontend/htdocs/uploads/tx_templavoila//customers/customer.de/frontend/htdocs/fileadmin/contents/dummy_images/a2.jpg
and an error is thrown: (errno=2 - No such file or directory) in
/customers/customer.de/frontend/typo3_src-4.0.5/t3lib/class.t3lib_befunc.php on line 1605
(issue imported from #M5132)

History

#1 - 2007-03-06 10:02 - Florian Busch (floxx)

Confirmed with TYPO3 4.1

#2 - 2007-10-30 17:55 - Petro Boychuk

Same problem with TYPO3 4.1.3 and Templavoila 1.3.1

#3 - 2007-11-07 13:19 - Nikolas Hagelstein

Confirmed on TYPO3 4.1.2 and TV 1.3.3

#4 - 2008-02-19 17:06 - Raffi no-lastname-given

Confirmed in TYPO3 4.1.5 and TV 1.3.3.
The problem does not appear in TYPO3 4.1 and TV 1.3.0.

#5 - 2008-02-28 11:37 - Robert von Hackwitz

It seems that isn't related to templavoila but to changes made in class.t3lib_tceMain.php from TYPO3 ver. > 4.1.1 inside method checkValue_flex_proInData_travDS.

Here are differences from 4.1.1 and 4.1.x:

@ -2130,7 +2138,11 @

```
if ($DSelements[$key]['section']) {
    foreach($dataValues[$key]['el'] as $ik => $el) {
        $theKey = key($el);
        -
                if (is_array($dataValues[$key]['el'][$ik][$theKey]['el'])) {
```

// It may happen that an element exists in \$dataValues but is missing in \$dataValues_current. In this case, just skip the element..

```
+
                $elExists = is_array($dataValues_current[$key]['el'][$ik]);
```

```
if ($elExists && is_array($dataValues[$key]['el'][$ik][$theKey]['el'])) {
```

...Obviously IMHO

#6 - 2009-09-03 12:16 - Darren Clark

Confirm that this is still an issue with 4.2.8 and templavoila 1.37

A FCE which has a section which contains an image element does not work correctly, debugging the checkValue_flex_proclnData_travDS method the values are present in the dataValues_current array but not handled correctly.

I'm sponsoring this fix at 100Euro to correct this issue.

Thanks in advance

#7 - 2009-09-08 11:41 - Nick Lobeck

<http://bugs.typo3.org/view.php?id=5665> is related to this bug.

Fixing of this bug is very important to me - I raise the sponsorship ...

#8 - 2009-10-11 20:57 - Tolleiv Nietsch

I can't reproduce this ... why would you even place an image within the section itself? The image should sit inside a container which is part of the section ... could someone check whether this issue is still relevant?

Btw - Flexformhandling is not a TemplaVoila issue - that's a Core issue

#9 - 2010-03-08 16:21 - Darren Clark

Ok this issue doesn't exist with 4.3.2 and templavoila 1.5.0 so for me the issue is closed.
