Description			
<p>Currently there's no possibility to execute a post processing on each link. There's a way to do this in t3lib_tstemplate->linkData (e.g. RealURL uses this), but it's only for internal links to pages. For links to an external resource there's no way to handle this in a general context with typoLink.</p> <p>The feature request is to implement "\$GLOBALS['TYPO3_CONF_VARS']['SC_OPTIONS']['t3lib/class.t3lib_content.php']['typoLink_PostProc']".</p> <p>(issue imported from #M6734)</p>
