<b>Description</b>	
When a editor wants to preview a draft version in the liveworkspace the following error is shown: "The requested page didn't have a proper connection to the tree-root! (Broken rootline)"	
This error does not occur if the user has administration rights.	
TYPO3 Version 4.1.3	
The same or a similar issue was already reported and should have been resolved in version 4.1.2.

### History

#### #1 - 2007-12-10 12:02 - Administrator Admin

I can confirm this problem.

#### #2 - 2008-01-08 10:23 - Dmitry Dulepov

It appears that issue happens only and only for non-admin user

#### #4 - 2008-07-29 15:45 - Hercules Karvasonis

I have the same problem with 4.2.

Non-Admin users cannot preview pages versions in the Live Workspace.

Did anybody find a fix about that?

#### #5 - 2008-10-02 13:36 - Mansoor Ahmad

The same problem also have the Typo3 4.1.2!

#### #6 - 2009-01-28 16:23 - Yannick Pavard

Same problem with 4.2.3.

Page id = 1606, but preview id is 1607.

#### #7 - 2009-11-03 13:22 - Andreas Heling

I made a patch for this issue. It is for version 4.2.9.

The problem was that `$this->getRecord('pages',$id,'pid,t3ver_oid')` in `t3lib_userAuthGroup::isInWebMount()` function returns null, because the `$TCA` is not set at this time.

**#8 - 2009-11-26 21:08 - Thomas Rehhoff**

Along the same line: This is both for admins and non-admins btw.

- 1) Make a new version of a page (or a page and it's content - doesn't matter) - in live workspace.
- 2) switch to version preview (by right clicking on the page and in the click-menu choose "versioning" - NOT by using the Versioning-module!))
- 3) now you have Version overview and se the 2 versions of the page nicely aligned.
- 4) Click the preview icon of the unswaped page = you get the broken rootline error as mentioned in teh bugreport.

Btw, it's completely confusing, that there's a module "Versioning" and a clickmenu item called "Versioning" - but the y lead to completely different interfaces and functions of TYPO3.

**#9 - 2011-08-22 16:07 - Tolleiv Nietsch**

- Status changed from New to Closed
- Target version deleted (0)

Issues have been fixed with the changes made in 4.5 - I assume this is outdated, feel free to reopen if that assumption was wrong

**#10 - 2013-12-10 01:03 - Michael Stucki**

- Category set to Workspaces

**#11 - 2013-12-10 01:05 - Michael Stucki**

- Project changed from 624 to TYPO3 Core
- Category changed from Workspaces to Workspaces
