Description

This bug report concerns the following:

- changing namespace of ajaxIds from e.g. "foldertree_ExpandCollapse" to "SC_alt_db_navframe::ExpandCollapse"
- add TYPO3AJAX::setContent(\$content) to completely overwrite the data array
- add the possibility to use a non-associative content array by addContent(null, 'whatever')
- add the missing format types "jsonhead" and "jsonbody"
- fix some phpdoc related things

(issue imported from #M7124)
