Description

Hi

Lets say there are three languages:

L=0; L=1; L=2

and in the TypoScript Template there is:

```
config.sys_language_mode = content_fallback; 1,0
```

So if a page is not available in L=2 it will be shown in L=1

But the url generated by RealUrl still is shown in L=0

Greetings

Sareen

That's not RealURL's issue. RealURL only generates URLs using exact parameters provided by the TYPO3 core. TYPO3 core should provide other parameters.

Forwarding to core.

#2 - 2013-05-06 09:56 - Alexander Opitz

- Status changed from New to Needs Feedback

- Target version deleted (0)

- TYPO3 Version set to 4.2

The issue is very old, does this issue exists in newer versions of TYPO3 CMS (4.5 or 6.1)?

#3 - 2013-09-09 08:47 - Alexander Opitz

- Status changed from Needs Feedback to Closed

- Is Regression set to No
