Description			
If you use the "foreign_selector" option in inline records, the localization links are disappeared. (after localize a IRRE Record)			
(...) "foreign_selector" => "usage_id", 'appearance' => Array('showSynchronizationLink' => 1, 'showAllLocalizationLink' => 1, 'showPossibleLocalizationRecords' => 1, 'showRemovedLocalizationRecords' => 1,) , 'behaviour' => array('localizationMode' => 'select',) , (...)

Any news here? Can we release TYPO3 4.2 without this one? Otherwise it's blocking the release!

This bugfix takes some time. TYPO3 4.2 can be released without out - this issue must not block TYPO3 4.2-final.

Some news here? I'm using the patch for 4.2, 4.3, 4.4 it's working. Is the patch not complete?

Greetings
Martin

This bug is very old and still alive (Typo3 4.5).

The solution with separating the localization links from 'new record' link is still working for me. The patch-code I'm using for Typo3 4.5 looks a littlebit different than the uploaded patch. Don't know how to contribute my fix, using the git framework.. ;)
