Description			
The following error happens to me when I'm saving a tx_cal_event record that has uses the RTE HTMLArea: Catchable fatal error: Argument 1 passed to t3lib_div::array_merge_recursive_overrule() must be an array, null given, called in /var/www/vhosts/test/TYPO3_4-2/typo3/sysextrtehtmlarea/class.tx_rtehtmlareaapi.php on line 75 and defined in /var/www/vhosts/test/TYPO3_4-2/t3lib/class.t3lib_div.php on line 1764 The attached patch fixes the problem. This error occurs in FE? Something is wrong, because LOCAL_LANG is set in class.tx_rtehtmlarea_pi2.php by

```
$this->LOCAL_LANG = t3lib_div::readLLfile('EXT:' . $this->ID . '/locallang.xml', $this->language);
```

and t3lib_div::readLLfile always returns an array.

Otherwise the error occurs in the BE and rte api entered into the wrong branch.

I installed the attached patch and it works fine.

The problem is, that I can't create hyperlinks by clicking on the link icon. Sometimes the correct pop-up window for creating hyperlinks was opened, but sometimes one half of the popup window for inserting an image was opened.

I think the patch doesn't work correctly because before installing this patch, hyperlinks could be created without any problems.

#3 - 2008-05-20 13:21 - Dmitry Dulepov

I have the same for tt_news when I have FE open in another tab in the same FF instance.

I reported this once in dev list but it was not reproducible. I thought it is unique problem for me.

#4 - 2008-05-20 13:22 - Dmitry Dulepov

Btw, happens only when new item is created!

#5 - 2008-05-20 13:30 - Administrator Admin

I have the problem also with tt_news.

#6 - 2008-06-26 00:22 - Stanislas Rolland

Please test with attached patch:

rtehtmlarea_bugfix_8314.patch

in your environment(s).

#7 - 2008-06-27 22:12 - Stanislas Rolland

Fixed in SVN TYPO3core branch TYPO3_4-2 revision 3848 (for inclusion in TYPO3 4.2.2) and trunk revision 3849.
