#### Description

The internal caching in t3lib\_pageSelect::getRootLine() has no effect since the key to store the information (\$uid) will always be "0" since the rootline is fetched from the current page up to the root page. Unfortunately the \$uid gets overridden by the uid of the parent page in each step of the iteration.

(issue imported from #M9335)

#### History

##### #1 - 2008-09-28 22:10 - Oliver Hader
