Description

The Sorting order of versions in Extension Manger Drop Down Box seems to be wrong for me. Normally the newest version should be shown up as pre-selected element.

In the moment everytime the version at the bottom has to be choosen. Costs time and nervs because an unwanted old version is installed very easy. Perhaps it could be sorted in reversed order like a blog or a guestbook.

(issue imported from #M9343)

The drop down coming up, when you install a new extension has the right order in TYPO3 4.3. The newest version is at top and "preselected" that way.

Maybe the problem you mention was part of the EM not sorting version numbers correctly? (There was something like that.)

However, it seems to work correctly for now.

Resolved with #22378 and those related to that one.
