Description

Even if the content is correct in the database, when the page is generated or the content edited in the backend, its rte text is messed up. An example is attached to this report.

Server: Debian etch
Php: 5.2.0-8etch11
(issue imported from #M9491)

History

#1 - 2008-10-06 10:56 - Pierrick Caillon

More information:
- typo3 4.2.1

#2 - 2008-10-08 11:47 - Oliver Hader

What exactly do you mean by "messed up"? Is it about the special french characters (e.g. like "être")?

#3 - 2008-10-09 10:45 - Pierrick Caillon

No, if you compare the two file, you can notice that some text and tags are missing from the provided content. For example, one case is that we have this in the content element :

```
<h3>my title</h3>
```

and we obtain :

```
<h3>my title&lt;/h3&gt;
```

Another instance is :

```
Yeah, let's go with that <b>text</b>.
```

changed to

```
o with that <b>text</b>.
```

or like that.

The original content file provide the bodytext record data of the miss converted content.

The generated page contains the content of the cache for the page containing the content element provided just before.

I am using templavoila for template.

#4 - 2009-03-12 21:00 - Juha Tiensyrja

I seem to have the same problem: some tags are randomly changed from normal tags to entity versions (i.e. those that have & lt ; or something similar).

This also happens in random pages most commonly with link tags, which prevent us from having working links to outside pages. Clearing the cache and reloading pages makes the problem sometimes disappear only to return after some random time.

This bug is annoying me out of my mind, so if I can provide any additional information I would be glad to help!

Typo3 version is 4.2.6 and PHP version is 5.2.6.

#5 - 2009-03-16 10:41 - Juha Tiensyrja

I might have resolved this problem by disabling config.xhtml_cleaning = all in the template. At least after that I haven't received any malformed pages.

EDIT: I'm sorry, it actually didn't help. It however changed the pages on which this problem occurs. And it seems to have fixed another small problem

with tt_news plugin.

- *Category deleted (Communication)*
- *Status changed from New to Needs Feedback*
- *Target version deleted (0)*

The issue is very old, does this issue exists in newer versions of TYPO3 CMS (4.5 or 6.1)?

#7 - 2013-09-09 09:50 - Alexander Opitz

- *Status changed from Needs Feedback to Closed*

No feedback for over 90 days.
