**Description**

we have `INSERTquery,UPDATEquery,DELETEquery,SELECTquery` but no `SELECT_mm_query`.

Having this would make much more easy building/examing these queries as they are some of the most complex ones.

As the syntax is only slightly different to the `exec_SELECT_mm_query` i used that one and changed it.

(issue imported from #M9620)

**Associated revisions**

[FEATURE] Add `SELECT_mm_query` to DatabaseConnection

Query building and execution has been separated to facilitate inspection of the generated statements as well as enabling the usage of the statement building in EXT:dbal.
