#### Description

The TypoScript object USER does not support the includeLibs property. Loading an accordant PHP class the library gets added to the global context and included there - no matter if it's really required or not.  
This is somehow a waste of performance and memory.

The solution is to enable "includeLibs" also for USER objects and only load the PHP class if it's really required.

(issue imported from #M9654)

#### History

##### #1 - 2008-10-27 19:42 - Oliver Hader

The attached patch enables includeLibs for USER and COA objects.

##### #2 - 2008-10-27 20:01 - Oliver Hader

Missed to change t3lib\_extMgm::addPtoST43() to use the USER.includeLibs now...

##### #3 - 2008-11-03 13:26 - Oliver Hader

Committed to SVN Trunk (rev. 4411)
