Description	
It would be nice to have a better trim function inside stdwrap to trim additional chars and not only white spaces otherwise a userfunc is kind of necessary TS could look like lib fo = TEXT lib fo { value = 13,12,11, trim = 1 trim.charList = , } (issue imported from #M9879)

- Status changed from New to Needs Feedback

As this report is very old, is the handling in newer TYPO3 CMS Versions (like 6.0/6.1) more like you expect it?
