

## TYPO3 Core - Bug #19683

### Extending palettes and fields to be displayed in back-end forms mixes up tabs

2008-12-04 16:56 - Oliver Hader

<b>Description</b> A misbehaviour in t3lib_extMgm results in missing tabs when TCA types or palettes definitions get extended. The reason is, that a duplicate check for field names does not work for "--div--" or "--palette--" which might occur multiple times.  (issue imported from #M9897)

#### History

##### #1 - 2008-12-04 16:59 - Oliver Hader

The attached patch solves this issue.

Additionally there are some more changes concerning the naming. All occurrences of "field" or "fieldList" were changed to "items" oder "itemList".

##### #2 - 2009-01-08 11:39 - Oliver Hader

Committed to SVN Trunk (rev. 4661)

##### #3 - 2009-06-23 14:38 - Michael Stucki

As discussed long time ago I have reverted this fix and replaced it with a new solution now. See rev. 5622, 5623, 5624).
