

TYPO3 Core - Bug #20062

Crash in the FE in 4.2.x branch (regression)

Description

If I open my start page in the FE, I get the following error:

Fatal error: Cannot use string offset as an array in /home/klee/eclipse/TYPO3_4-2/typo3/sysext/cms/tslib/class.tslib_fe.php on line 713

This occurs independent of whether simulateStaticDocuments or realURL is enabled.

The problem only occurs on the current 4.2.x branch, not on the trunk or on the version tagged as 4.2.6. So this seems to be a recent regression.
