Description

When frontend editing is enabled in t3lib_tsfebeuserauth we create a new instance of the frontend editing controller which serves as an indicated that frontend editing is active. In the past, a member variable named extAdmEnabled was the flag that indicated frontend editing was active.

Extensions may rely on `$BE_USER->extAdmEnabled` so it should continue to be set when frontend editing is active.

(issue imported from #M10599)
