**Description**

The admin panel has a functionality to simulate frontend user groups (Admin Panel > Preview). However, the submitted value is not set corretly to BE_USER->uc and the simulation does not work at all.

## History

#### #1 - 2009-05-23 02:43 - Niels Fröhling

The trigger-code for the preview is in:

typo3/sysext/cms/tslib/class.tslib_fe.php: 792 determineId()

All the involvement of the preview-options in page-rendering happens there, I'm looking for the failure there, maybe I find an easy fix.

#### #2 - 2009-05-23 03:06 - Niels Fröhling

$GLOBALS['BE_USER']->frontendEdit

Is not set [isset is false] when entering the function ...

#### #3 - 2009-05-23 03:12 - Niels Fröhling

Okay, the reason is priority-inversion:

typo3/sysext/cms/tslib/index_ts.php: 317+

"$TSFE->determineId()" is called before "$BE_USER->initializeFrontendEdit()"

In 4.2.0 the order was inversed:

typo3/sysext/cms/tslib/index_ts.php: 226+

"t3lib_div::makeInstance('t3lib_tsfeBeUserAuth')" was called before "$TSFE->determineId()"

I don't know if per-se the FE-init block can be moved before the workspace-preview-init. I am not so clear in which way the priorities are inter-mingled there ...

#### #4 - 2009-05-23 16:15 - Oliver Hader

Hi Niels, thanks for pointing it out. I came to the same conclusion. Since the adminPanel was extracted from tsfeBeUserAuth, it has to be initialized explicitly before TSFE->determineId().

#### #5 - 2009-05-23 16:58 - Oliver Hader

Committed to SVN Trunk (rev. 5488)
