Description			
You can't create preview links for alternative page languages. Only a preview link for the default page language is available.			
I have patched this by creating a preview link for each alternative language available on the page.

[BUGFIX] Workspace preview links for multiple languages

The workspace preview link will only be generated for one language at a time, so it might require some effort to generate preview links for multiple languages.

For convenience of editors, preview links will now be generated for all available translations of a certain page in a batch.

The concerning file is typo3/sysex/verion/cm1/index.php.
The uploaded file index.php includes my patch and index_old.php is the current version.

The TYPO3 core version is 4.1.12.
My patch is from line 682 to 707.

#2 - 2009-08-09 23:39 - Tolleiv Nietsch

if you open up the workspace-preview module with in right language the generated preview-link will carry-on that language

btw your "patch" creates links without checking whether the User has a right to "view" the language...

btw you might want to read this before you send out "patches"...

The way he produced the patch might be faulty, but I can confirm that the generated preview link is in the default language. I tried it with TYPO3 4.2.12 and 4.3.3. Both times the same problem.

The generated Preview is in english but not the extra generated Preview link for Foreigners without BE-Access.

#4 - 2010-06-09 16:48 - Constantin Lebrecht

that patch for 4.3.3 generates Preview-Links for all valid languages on the given page...

the patch bug_11672.diff works well for us in typo3 4.3.3
