Description

It seems that it is not possible to install a sys ext through the Extension manager.

it seems the check fails in class.em_index.php [#15203](#)

```
if (!$EM_CONF['lockType'] || !strcmp($EM_CONF['lockType'],$loc)) {
```

```
$EM_CONF['lockType'] => system
```

```
$loc => S
```

Hi Georg,
did you want to upload/upgrade an extension or just install/enable?

#2 - 2009-10-12 17:15 - Georg Ringer

hi! i tried to upload + install an sys ext through the EM and of course I set in install tool that exts can be installed in typo3/sysext

#3 - 2011-08-14 15:58 - Susanne Moog

- Status changed from Needs Feedback to New
- Assignee changed from Oliver Hader to Steffen Kamper
- Target version deleted (0)
- TYPO3 Version changed from 4.3 to 4.5

I can't reproduce this with the old extension manager. However I can't install as a system or global extension with the new extension manager, so I'll leave this bug open for the new ext mgn.

#4 - 2011-09-24 15:34 - Helmut Hummel

- Target version set to 4.6.0-RC1

#5 - 2011-10-05 20:36 - Steffen Gebert

Why can't you install a system extensions? I have no problems..

#6 - 2011-10-06 11:09 - Dmitry Dulepov

I have a related problem.

When I upload the file, I have only "Local" as the install option.

I enabled System and Global in the Install tool and permissions to typo3/ext and typo3/sysext are set to 0777.

#7 - 2011-10-08 21:50 - Felix Kopp

What about removing the Global option at all?

Local should be sufficient.

Removal is easy and could be done for 4.6 also.
