<b>Description</b>			
<p>The message is shown to a user if the be-user record has been created and a language has been defined which is not yet available.</p> <p>It looks very strange to the editor because he doesn't know which language has been chosen. Therefore it makes sense to show the language title</p> <p>How to reproduce:</p> <ul style="list-style-type: none"><li>- Create an BE user and set a default language which doesn't exist yet in typo3conf/l10n</li><li>- Switch to the user and go to the user settings module</li></ul> <p>(issue imported from #M12032)</p>
