

TYPO3 Core - Bug #21625

Section links coming from RTE broken in FE: rendered as #14185& instead of #c123

2009-11-20 14:53 - Uschi Renziehausen

Description			
Problem: If you enter a link to a specific CE via RTE the href-attribute points to a nonexisting id. Instead of #c123 you get #14185& in FE. When you first enter the link in RTE, the href looks like this: In DB the link looks like this: <link 512#14185& - internal-link> And FE: href="/area-51/bilder/bilder-im-rahmen/#14185&" Uschi (issue imported from #M12682)

History

#1 - 2009-11-23 11:29 - Oliver Hader

Works fine on my site with 4.3-RC1.
Where is the ampersand "&" coming from? Are there extensions installed on your installation that modify these links?

#2 - 2009-11-23 12:16 - Steffen Kamper

sounds like wrong configured linkhandler

#3 - 2009-11-26 06:46 - Stanislas Rolland

1. There is a superfluous ampersand coming from the RTE (when the query parameters field is enabled but contains no value).
2. Links that have both a section and additional parameters are not correctly inserted in the RTE and therefore are not correctly transformed on the way to the database.
3. Such links that have both a section and additional parameters are not correctly transformed on the way to the RTE.
4. Finally, whether they come from the RTE or not, typolinks that have both a section and additional parameters are not correctly rendered on the frontend.

Please test attached patch.

#4 - 2009-11-26 11:17 - Uschi Renziehausen

Hey Stan,

thx a lot! My anchor links are working again like a charm.

Uschi (sending some coffee over the bugtracker)

#5 - 2009-12-09 16:07 - Stanislas Rolland

Committed to SVN TYPO3core trunk (revision 6644) and branch TYPO3_4-3 (revision 6645).

#6 - 2018-10-02 12:26 - Benni Mack

- Status changed from Resolved to Closed
