<b>Description</b> in the function <code>t3lib_befunc::exec_foreign_table_where_query</code> a lot of default markers (like <code>CURRENT_PID</code> , etc.) are replaced. It would be useful to have this substitution available as single function, so that it can be called without executing some query. Furthermore the function for substitution should be integrated in <code>t3lib_div</code> because it's a very basic purpose and hasn't logically to be restricted to backend.  (issue imported from #M13114)

[FEATURE] Substitution of default markers in single function

In the function  
TYPO3\CMS\Backend\Utility\BackendUtility::exec\_foreign\_table\_where\_query  
a lot of default markers (like `CURRENT_PID`, etc.) are replaced.  
It would be useful to have this substitution available as single function, so that it can be called without executing some query.

- Target version deleted (0)

this patch breaks the functionality of the complete BE.  
I am not able to edit the page headers anymore.

The error: you give the wrong parameter order:

you call:

```
static::replaceMarkersInWhereClause($fTWHERE, $field, $TSconfig, $foreign_table)
```

function:

```
function replaceMarkersInWhereClause($whereClause, $table, $field = "", $tsConfig = array())
```

**#7 - 2013-08-09 17:00 - Anja Leichsenring**

- TYPO3 Version changed from 4.3 to 6.2

Fix is on the way, thank you for reporting the error. Find it here: <http://forge.typo3.org/issues/50976>

**#8 - 2018-10-02 12:41 - Benni Mack**

- Status changed from Resolved to Closed
