Description When creating a custom workspace you can define the mount points to this workspace, however in practice it is more practical to assign users to the workspace and to use the default DB and Filemount permissions. The uploaded patch allows the fileadmin to list the users file mounts. (issue imported from #M13763)

Note, this issue is related to:

<http://bugs.typo3.org/view.php?id=4203>

This extends the patch to allow for a workspace setup to allow options such as a custom file mount point or to use the default user file mount point permissions.

#2 - 2010-04-11 23:15 - Darren Clark

Updated patch for TYPO3_4-3-3 and included permissions for admin's to get filemounts in draft workspace attached patch 13763_v2.patch

#3 - 2010-12-04 11:05 - Benni Mack

Hey Darren,

this should be fixed with [#16554](#) and solved in TYPO3 4.5 beta2. Can you confirm this?

#4 - 2011-03-03 09:45 - Tolleiv Nietsch

No feedback for quite some time - assuming that this is already solved
