Description	
this is another bug causing typo3temp to fill up with files which will never be deleted, on frequent visited sites this can slow the site down within days or weeks	
Like http://bugs.typo3.org/view.php?id=12376	
temporary files will be created with IDs/names using something like "md5(microtime())"	
The submitted patch works but is slow and dirty. It takes the serialized array variable of the item as a substitution of "microtime()".	
The best solution is a management of temporary files by offering library functions for generating IDs and creating and deleting temp files.	
(issue imported from #M13886)

History

#1 - 2010-03-22 18:20 - Oliver Hader

I guess that this issue already appeared in TYPO3 4.2, didn't it?

#2 - 2010-03-30 10:15 - Mittwald CM

Yes, it's also in version 4.2.

And 4.1, 4.0, 3.8 and 3.7! The line numbers differ:

3.7.0/src/typo3/sysext/cms/tslib/class.tslib_menu.php:2128

3.8.1/src/typo3/sysext/cms/tslib/class.tslib_menu.php:2128

4.0.13/src/typo3/sysext/cms/tslib/class.tslib_menu.php:2178

4.1.13/src/typo3/sysext/cms/tslib/class.tslib_menu.php:2192

4.2.12/src/typo3/sysext/cms/tslib/class.tslib_menu.php:2297

4.3.2/src/typo3/sysext/cms/tslib/class.tslib_menu.php:2331

The worse code fragment "md5(microtime())" is found many times in all versions.

#3 - 2013-04-01 11:56 - Christian Kuhn

- Target version deleted (0)

I'm closing all the other `_LAYERS` related issues currently, but a small grep showed that the code in question here is still present in 6.1, so I'll leave this issue open for now ... we'll see if it pops up again.

#4 - 2015-01-15 11:25 - Mathias Schreiber

- Status changed from Accepted to Closed

- Is Regression set to No

was silent long enough ;-)
