Description			
<p>If you upgrade from 4.3 and choose the <code>css_styled_content</code> static template "v4.3/", no frontend plugin from extensions will be rendered in the frontend.</p> <p>Switching to another <code>css_styled_content</code> template will make the rendering appear.</p> <p>FE-plugins are registered through</p> <pre>t3lib_extMgm::addPltoST43()</pre> <p>which include typoscript code right after the "content (default)" or "css_styled_content". This is currently hardcoded in <code>t3lib_extmgm::addTypoScript</code>.</p> <p>When we added the v4.3 static template, we forgot to update the array or content rendering templates.</p> <p>Solution is to move the hardcoded array away from the core and provide a registry of <code>renderingTemplates</code> which <code>css_styled_content</code> then uses (including the new v4.3 template). (issue imported from #M14231)</p>
