

TYPO3 Core - Bug #22792

Install Tool seems to rely on the "autostart session" option from PHP

Description

Although cookies were activated, I tried to login into the install tool without success. The javascript popup message has been coming up over and over again.

simple "session_register();" at the begining of the following file fixed the issue

typo3/install/index.php

(issue imported from #M14596)

History

Can't reproduce. I also have session.auto_start = Off and it works.

There's a session handler class in the Install Tool. Could you please check, whether the code there (including session_register() or similar) is correctly executed?

#2 - 2010-06-08 12:38 - Artur Cichosz

Now I can't reproduce it either. I suspect the problems had something to do with inappropriate DNS-Konfiguration / -redirection or safe mode. These were the only changes made by the admin since I'd reported this issue.
