Description	
<p>In the Import / Export module, I try to select some tables for export. Then I click on "Update" and my selection is gone, but the preview shows all the data I selected. When I click "Update" again, the preview only shows pages.</p> <p>This is the same for "Include relations to tables" and "Use static relations for tables".</p> <p>The states of the drop down menu "Levels" and of the check box "Show static relations" are saved though.</p> <p>I was able to reproduce this in 4.4RC2 and in the current trunk.</p> <p>(issue imported from #M14810)</p>

I think I figured it out.

I think the foreach loop in lines 1645:1649 must be changed to this:

```
foreach ($TCA as $table => $table_value) {  
if ($GLOBALS['BE_USER']->check('tables_select',$table) && t3lib_div::inList($excludeList,$table)) {  
$optValues[$table] = $table;  
}  
}
```

Otherwise, the "\$value" (which is now changed to \$table_value) will be assigned to the [ctrl] section of the last TCA entry. I'll test this and apply a patch.

edit: Sorry, I forgot to include the path in the diff. The file 14810_02 is the correct one which could be patched against current 4.4

#2 - 2010-07-15 21:24 - Alexander Stehlik

Works like a charm.

Thank you Thomas!

#3 - 2010-07-15 21:49 - Chris topher

Hi Thomas,

do you know that you should now send your patch to Core List?

Check out <http://typo3.org/teams/core/core-mailinglist-rules/>

#4 - 2010-07-15 23:08 - Tommy Juhnke

Hi Alexander & Christopher,

I've done that already and the patch is committed to the trunk for TYPO3 v4.5 by Ernesto:

<http://forge.typo3.org/projects/typo3v4-core/repository/revisions/8079>

Note: there's also a discussion going on in the Core Mailinglist for adding the \$_ usage in foreach loops for unused key vars to the CGL.

#5 - 2010-07-15 23:31 - Chris topher

Ahh, I missed that one. Thanks for the pointer!
The CGL issue might go on and can result in another RFC, but this one is done. :-)

So:

Committed by Ernesto to
4_4: Rev. 8080
trunk: Rev. 8079

#6 - 2018-10-02 12:23 - Benni Mack
