

TYPO3 Core - Bug #23272

Incorrect backpath used when including default and skin stylesheets

2010-07-26 22:50 - Jeff Segars

Description

CSS paths in typo3/template.php are currently calculated using `$GLOBALS['BACK_PATH']`. Elsewhere in `t3lib_tceforms`, `$this->backPath` is used instead of `$GLOBALS['BACK_PATH']`. `$GLOBALS['BACK_PATH']` may not be available in all contexts, leading to missing styles.

The issue can easily be seen in frontend editing, where the CSS for sprite images is not loaded due to the incorrect path. In this instance `$this->backPath` is set properly and used elsewhere in `t3lib_tceforms` but `$GLOBALS['BACK_PATH']` is not.

In previous versions of TYPO3, `$this->backPath` was not set at all in the backend context because all of the views were directly inside `/typo3/` and no back path was needed. After moving list view and other modules to extensions, a back path is needed so the first hunk in this patch sets `$this->backPath` to `$GLOBALS['BACK_PATH']` in the normal backend context. While its related to this patch, it could also be a followup to RFCs 15149-15155.

History

#1 - 2010-07-28 08:27 - Björn Pedersen

v2 at least gives the date picker back again. The icons are still either missing or replaced by a questionmark on red background.

#2 - 2010-07-28 23:42 - Jeff Segars

Yes, that is a separate issue that will need to be addressed by feeditadvanced. See <http://forge.typo3.org/issues/8072> for a preliminary patch to bring these icons back.

Thanks for testing!

#3 - 2010-07-30 02:28 - Jeff Segars

Björn, just FYI, i have now committed the feeditadvanced portion of the patch so the sprite icons should be working as expected when you use the latest dev version of feeditadvanced in conjunction with this patch.

#4 - 2010-08-05 19:05 - Jeff Segars

On second thought, this is actually more complicated than my patch. There are plenty of places in the core where the `backPath` is set outside the constructor and this patch would potentially impact them.

For now, I'll just address it in feeditadvanced by setting `$GLOBALS['BACK_PATH']` on my own.

#5 - 2013-11-13 14:57 - Alexander Opitz

- Status changed from Accepted to Needs Feedback

- Target version deleted (0)

- Is Regression set to No

Hi,

as this issue is very old. Does the problem still exists within newer versions of TYPO3 CMS (4.5 or 6.1)?

#6 - 2014-03-06 09:14 - Alexander Opitz

- Status changed from Needs Feedback to Closed

- Assignee deleted (Jeff Segars)

No feedback within the last 90 days => closing this ticket.

If you think that this is the wrong decision or experience this issue again, then please write to the mailing list typo3.teams.bugs with issue number and an explanation or open a new ticket and add a relation to this ticket number.
