

TYPO3 Core - Bug #23503

In TCA Palletes section keyword "--linebreak--" does not work

2010-09-04 21:21 - Florian Sauer

Description

Inserting the reserved word "--linebreak--" as a "field" in the fieldlist of a palette has no effect in the rendered form of the backend

Suggestion:

In class t3lib_TCEforms - function printPalette(\$palArr)

change

```
$out = '&lt;fieldset class="t3-form-palette-fieldset"&gt;';
    for ($i = 0; $i <= $row; $i++) {
        $out .= implode($iRow[$i]);
    }
    $out .= '&lt;/fieldset&gt;';
```

to

```
$out = "";
for ($i = 0; $i <= $row; $i++) {
    $out .= '&lt;fieldset class="t3-form-palette-fieldset"&gt;';
    $out .= implode($iRow[$i]);
    $out .= '&lt;/fieldset&gt;';
}
```

This worked for me, as all fields of a palette left and right of "--linebreak" will be enclosed in their own <fieldset> (issue imported from #M15640)

History

#1 - 2010-09-09 15:43 - Andreas Kiessling

That was fixed 2 days after release of 4.4.2:

<http://bugs.typo3.org/view.php?id=15131>

#2 - 2010-09-09 16:11 - Chris topher

Resolved as duplicate of [#23192](#).

Indeed, the fix will be part of TYPO3 4.4.3.
