<b>Description</b>			
Use Case: We have x DB Mounts (e.g. 30) and if we add a new DB Mounts TYPO3 append this at the last position.  It was very useful if we can select a position (e.g. 6) and TYPO3 use this position and append the new DB Mount at position 7.  (issue imported from #M15750)

Hi,

as this issue is very old. Is this feature missing in newer versions of TYPO3 CMS (4.5 or 6.1)?

Hi,

this feature is still missing. But this is more an ui "problem".

Example:

You add an DB Mount or Usergroup in usermanagement. TYPO3 append this group at the end. In some cases you must sort the groups because of some special rights. Maybe you must move the usergroup from position 35 to 12. This are some clicks ;-)

A nice feature will be a jQuery UI Drag and Drop for groups / db mounts and so on.

(Priority: Nice to have but not important)
