Description	
<p>If you have more than one login form on one page only the last rendered login form will work. This happens because when the second login form is rendered the created private key overwrites the first form's private key. This problem is also described on forge: http://forge.typo3.org/issues/6708</p> <p>In my patch the class tx_rsaauth_keypair is a singleton so that it will be used only one time. The patch also changes the backend classes to check if the class tx_rsaauth_keypair was already called. And it adds some error handling.</p> <p>The patch is created against TRUNK revision 10349.</p> <p>Kind regards, Marco</p> <p>(issue imported from #M17388)</p>

Revision 6c4c4d95 - 2014-01-09 01:43 - Tom Ruether

[BUGFIX] Only create one keypair in rsaauth

If there are two login forms on one page the second form's private key overwrites the first form's private key so the first form doesn't work. With this patch only one keypair gets created and it doesn't matter how many login forms you have one one page.

#17 - 2014-04-28 12:58 - Sebahattin Küçük

I use typo3 4.7.18 and sr_feuser_register 3.1.2 and have the same problem. I am using patch rsaaauth_trunk2.patch, but the problem still exists.
Please help
